You may get one or more of the above **ERRORS** while opening your existing workbooks after EtaTrader/KiteNet update.
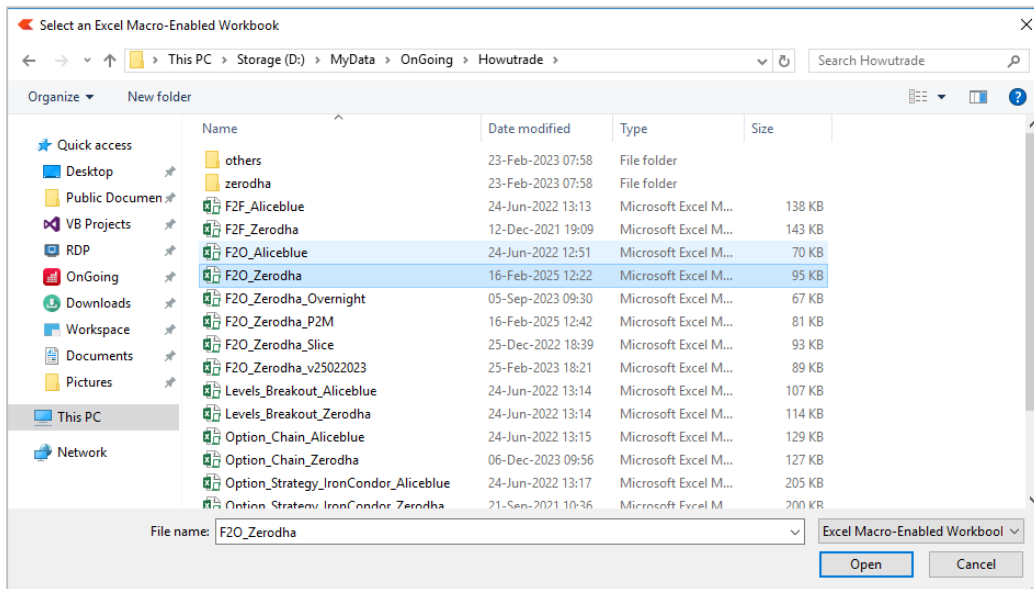

To rectify this error, you have to **RE-COMPILE** your each workbook once per computer or server.

(Close the Excel/Workbook WITHOUT saving if opened. Backup the workbook)

1. OPEN YOUR WORKBOOK IN SAFE MODE

Goto EtaTrader
|
Menu
|
Tools
|
Click 'Excel SafeMode'

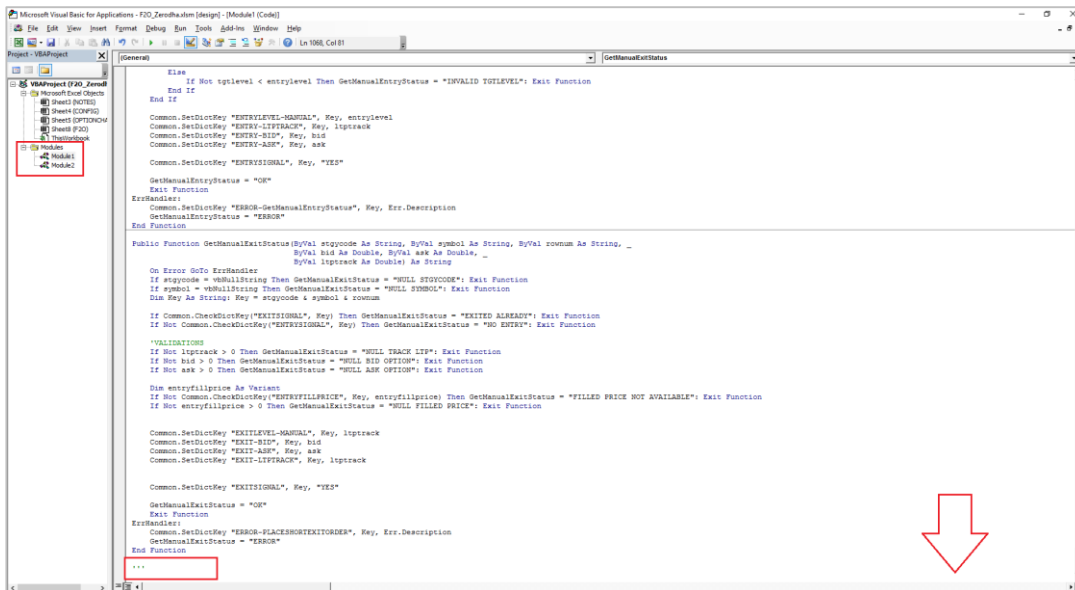

Select the required 'Excel Workbook'

Click 'Open'

(This will open the excel workbook in Safe Mode i.e. Macros Disabled)

2. OPEN VBA EDITOR AND EDIT CODE

**Right Click on ANY Sheet Name
And
Click 'View Code'**

(This will open Excel VBA Editor)

**In the 'Project Explorer' (Left Side)
Expand the 'Modules' tree
Double Click on ANY Module**

**Goto the bottom of the VBA Code
Type ''' (Three Single Quote) and Press Enter**
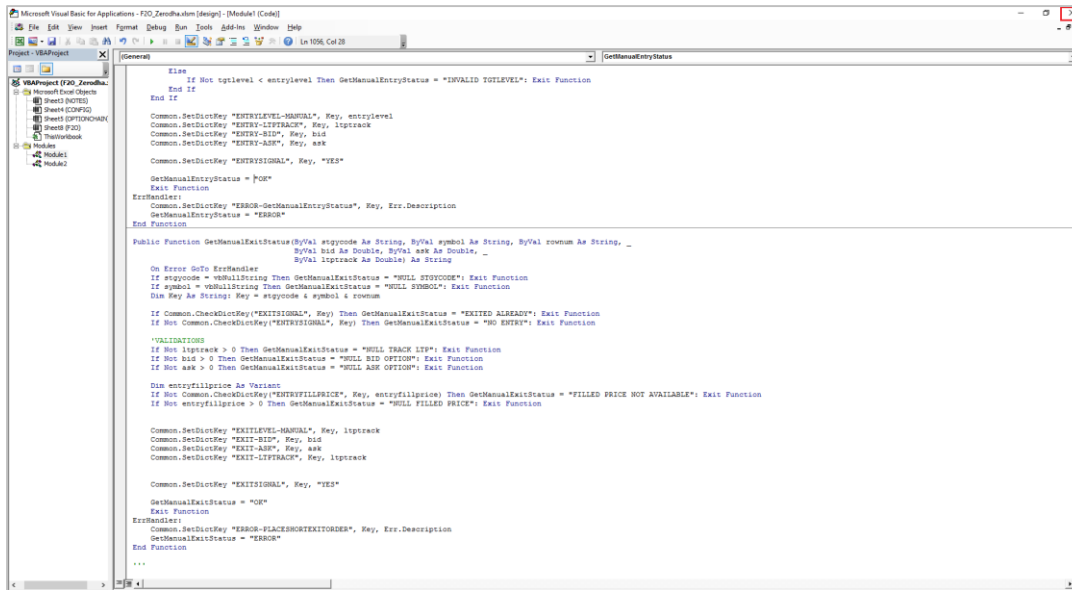

3. SAVE AND RE-COMPILE

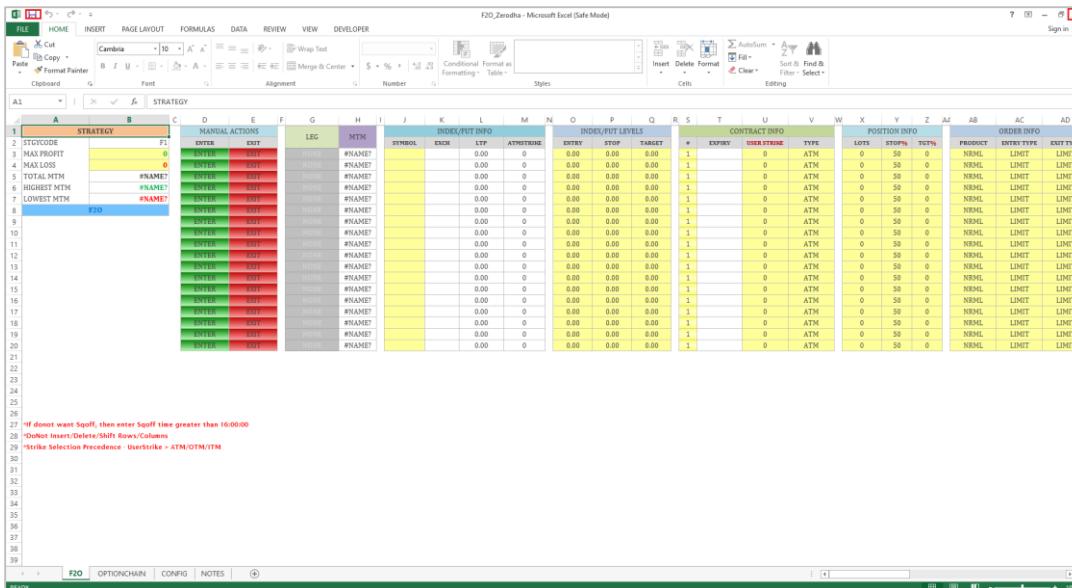

Save the VBA Code by
Clicking on the 'Save' icon

Goto Menu
|
Debug
|
Compile VBA Project

4. CLOSE VBA EDITOR

5. SAVE AND CLOSE WORKBOOK

Close the VBA Editor
By Click on the Close Button

Save the Workbook by
Clicking on the Save Icon

Close the Workbook
By Click on the Close Button

Now, you can open this workbook normally.

If the recompile is success then it won't throw any error.

(Same way recompile all the workbook once)
